East Head

West Wittering

50°47'15.2"N | 0°54'50.6"W | 30.10.2022 . 1400

Graphite drawings on location
Three film stills

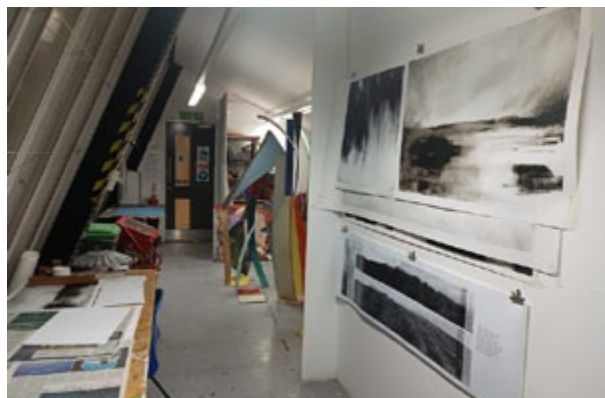

Battering. Moving grass
Constant movement
Bumping. Flapping. Flaring
swaying. Whimsical clouds
changing quickly. Sun brighter
waves, splashing, rocking. Slow
liberation over. Free. Fluttering.

Grasses, swaying, crossing each other.

ok oct 22.

OPEN CUT - **RECORD, REPEAT, REINVENT**

East Head, West Wittering . 30 . 10 . 2022

A Workshop led by Veronique Chance

Air, breeze, salt sea waves crashing in the distance. Thin straight grasses curve as they sway. Tough stems cross each other, overlapping, flowing, touching and erasing each other. The sky, moving silently overhead, passes gracefully, the grass only moves in its breath.

Project involving recording practice and documentation of an experience. A part of my long term study of the marram grass on East Head, West Wittering. Work presented for a crit showing a minute long black and white HD film of the grasses moving in the wind with sound (not shown here), graphite drawings made on location (note book - not shown), a photograph of my

shadow with two panarama photographs and the coordinates of the precise location on the dune with the date and time and words to describe the event (1.5m long digital print), a drawing made later in acrylic (dkma 0463 A1), landscape made from scraped lamp black oil paint on coated paper (dkma 0460 approx A1), pdf document with OS maps and additional information about the area (not shown).
